PHILOSOPHICAL MAGAZINE B, 1991, VOL. 64, NO. 6, 775–782

SUBJECT INDEX

Vol. 64

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

	PAGE
Ag_2Al precipitates, kinetics of	429 A
$AgInTe_2$, photoelectrical properties of	389 B
Al, dislocations in	245 A
Al, growth of on Si films	317 B
Al, oxide growth on	719 A, 345 B
Al based binary alloys, precipitation in	697 B
AlCoNi, stacking faults in	21 L
AlCoCuSi, quasicrystallinity in	401 L
AlCu, hydrogen trapping in	113 B
AlCu, phase transformations in	447 B
$Al_6Cu_{20}Co_{15}$, quasicrystalline, structure of	599 B
AlCuFe, phases in	129 L
AlCuFe, quasicrystals of	475 B, 49 L
Al_5CuLi_3, shear planes in	483 A
AlCuMn, icosahedral and decagonal phases in	343 L
AlGaAs and GaAs, double ribbons in	349 L
Alkali halides, diffusion in	1169 A
Al_6Li_3Cu quasicrystal, defects in	97 A
Alloys, ordered binary h.c.p., structures of	275 B
Alloys, random, matter transport in	709 A
AlMn alloys, disordered, Fermi level in	591 B
AlMnCu alloys, quasicrystals in	413 A
$Al_{70}Ni_{15}Co_{15}$, quasicrystal in	629 B
AlPdFe alloys, quasicrystals in	165 L
AlPdMn quasicrystal	197 L
Alumina clay composite, indentation of	77 L
Amorphous Ge:H, properties of	655 B
Amorphous $GeSe_2$, optical reorientation in	355 B
Amorphous metals, calculation of properties	299 B
Amorphous Nb_2O_5, conduction in	207 B
Amorphous semiconductors, a.c. conductivity of	579 B
Amorphous Si, space charge limited currents in	379 L
Amorphous Si:H, photoconductivity of	675 B
Amorphous solids, defects in	509 L
Antiferromagnets, optical rotation in	267 B
Antiphase boundary in Fe_3Al	1281 A
Antiphase domains in FeAl	797 A
Atom transport, correlation effects in	777 A
Atomic transport in defective solids	1011 A
b.c.c. crystals, crack propagation in	851 A
Bimaterials, dislocations in	1225 A
Binary alloys, Al based, precipitation in	697 B
Borate glasses, doped, structure of	495 A
Brittle–ductile transition in silicon	55 A

PAGE

Calorimetric glass transition, model of . . . . . 563 B
Carbon clusters in graphite vaporized films . . . . . 375 L
Cd and Zn, vacancies in . . . . . 735 A
CdS, twinning in . . . . . 303 A
Ceramics, flaw-insensitive . . . . . 191 L
Ceramics, ion transport in . . . . . 1183 A
Charge density waves in KMo_6O_{17} . . . . . 221 L
CMSX-2 nickel-based superalloy . . . . . 135, 143 B
Coherently strained semiconductor layers . . . . . 1 A
Composites, ionic transport in . . . . . 1161 A
Conduction, a.c., in InP . . . . . 233 B
Conductivity, hopping, one dimensional . . . . . 327 B
Conductivity and transition in CrGe . . . . . 49 B
Conductors, mixed, intercalated . . . . . 1103 A
Conductors, superionic, simulation of . . . . . 1147 A
CoNi, martensitic transformation in . . . . . 151 A
Coordination number and tracer diffusion . . . . . 83 B
Copper, phonon spectra of vacancy in . . . . . 639 B
CoPt alloys, two-phase mixtures in . . . . . 57 B
Correlation effects in atom transport . . . . . 777 A
Cottrell atmosphere, effect of dislocations on . . . . . 465 A
Crack propagation in b.c.c. crystals . . . . . 851 A
Crack tips, dislocation loops at . . . . . 931 A
CrC, twinning in . . . . . 1 L
Creep mechanisms and grain boundaries . . . . . 415 L
Creep of FeO . . . . . 765 A
CrGe, conductivity and transition in . . . . . 49 B
Cryolite-Na solutions, electron localization in . . . . . 167 B
Cu, dislocation relaxation in . . . . . 355 A
Cu, internal stresses in . . . . . 495 A
Cu, tip deformation in . . . . . 175 L
Cu and Al_2O_3, phase transitions in . . . . . 561 A
Cu precipitates in FeCu and FeCuNi . . . . . 383 L
Cube glide in a superalloy . . . . . 669, 697 A
Cubic antiferromagnets, optical rotation in . . . . . 267 B
CuFe, transformation of Fe in . . . . . 387 A
CuO superconductors, Fermi liquid in . . . . . 411 L
CuZnAl alloy, two variants of . . . . . 787 A

Damage in the electron SCRIBE process . . . . . 133 L
Defects in amorphous solids . . . . . 509 B
Defects in diamond . . . . . 137 A
Defects in superalloys . . . . . 111 L
Deformation in Y_2O_3 stabilized ZrO_2 . . . . . 923 A
Deformation mechanisms in $L1_2$ alloys . . . . . 365 L
Deformation of Ni_3Al . . . . . 807 A
Deformation texture in polycrystals . . . . . 1251 A
Diamond, defects in . . . . . 137 A
Diamond, lattice perfection in . . . . . 543 A
Dielectrics, losses and mobility in . . . . . 91 B
Diffuse scattering in YBaCuO . . . . . 29 L
Diffusion, grain boundary, model of . . . . . 1239 A
Diffusion in alkali halides . . . . . 1169 A
Diffusion in solid state systems . . . . . 749 B
Disclination in an elastic sphere . . . . . 281 A
Disclinations, Carothers' effect and stress in . . . . . 207 L
Dislocation loops at crack tips . . . . . 931 A

PAGE

Dislocation relaxation in Cu . . . . . 355 A
Dislocations, capped epitaxial layer of . . . . . 629 A
Dislocations, dissociated . . . . . 67 L
Dislocations, effect on Cottrell atmosphere . . . . . 465 A
Dislocations, light scattering from . . . . . 425 B
Dislocations in aluminium . . . . . 245 A
Dislocations in bimaterials . . . . . 1225 A
Dislocations in f.c.c. and ordered compounds . . . . . 951 A
Dislocations in ice . . . . . 289 A
Dislocations in $L1_2$ compounds . . . . . 311 A
Dislocations in metal crystals . . . . . 497 A
Dislocations in Nb_3Al . . . . . 59 L
Dislocations in Ni_3Al . . . . . 1291 A
Dislocations in PbS, TEM of . . . . . 29 A
Dislocations in quasicrystals . . . . . 819 A
Dislocations in rock salt, interaction force . . . . . 39 A
Dislocations in TiAl . . . . . 117 L
Dislocations in ZnO . . . . . 533 A
Disorder in SiC . . . . . 7 L
Dissociated dislocations . . . . . 67 L
Dissolution kinetics of Ag_2Al . . . . . 429 A
Drift mobility and losses in dielectrics . . . . . 91 B

Elastic sphere, disclination in . . . . . 281 A
Electrolytes, solid, lithium mobility in . . . . . 1115 A
Enthalpy cross-over in vitrified solids . . . . . 37 L
Epitaxial layer, capped, of dislocations . . . . . 629 A

f.c.c. and ordered compounds, dislocations in . . . . . 951 A
f.c.c. crystals, coherent tilt of . . . . . 71 L
Fe, reduction of magnetite to . . . . . 105 L
Fe films on Cu . . . . . 485 B
Fe in CuFe, transformation of . . . . . 387 A
FeAl, antiphase domains in . . . . . 797 A
Fe_3Al, shear APB interface in . . . . . 1281 A
FeAl, stacking faults in . . . . . 333 A
Fe_2B, structure of in FeCuNbSiB alloys . . . . . 157 L
FeCu and FeCuNi, Cu precipitates in . . . . . 383 L
FeCuNbSiB alloys, structure of Fe_2B in . . . . . 157 L
FeO, creep of . . . . . 765 A
Ferroelectrics, dielectric relaxation in . . . . . 335 B
Fibre reinforced materials, tensile strength of . . . . . 1265 A
Fibre strength, effect of size on . . . . . 1331 A
Flaw-insensitive ceramics . . . . . 191 L
Fractal analysis of crystalline surfaces . . . . . 443 A

GaAs, growth steps in . . . . . 165 A
GaAs and AlGaAs, double ribbons in . . . . . 349 L
GaAs and ZnSe, lattice images of . . . . . 81 A
Gap-state distribution in Si:H . . . . . 515 B
Ge, grain boundaries in . . . . . 463 B
Ge, krypton ion irradiated . . . . . 1209 A
Ge:H, amorphous, properties of . . . . . 655 B
Geminate recombination in a-Si:H . . . . . 227 L
$GeSe_2$, amorphous, optical reorientation in . . . . . 355 B
Glass, fragile, relaxation in . . . . . 421 L
Glass transition, model of . . . . . 563 B

	PAGE
Glasses, doped borate, structure of	495 B
Glasses, silicate, MAS NMR of	401 B
Gold particles grown on MgO	87 A
Grain boundaries and creep mechanisms	415 L
Grain boundaries in aluminium	719 A
Grain boundaries in Ge	463 B
Grain boundaries in polymers	903 A
Grain boundaries in stainless steels	1319 A
Grain boundary diffusion, model of	1239 A
Graphite intercalates, metal dichloride	181 B
Graphite vaporised films, conduction in	375 L
Growth mode transition in Si	219 B
Growth steps in GaAs	165 A
h.c.p. ordered binary alloys, structures of	275 B
He contained in metals, positron lifetimes in	119 B
Heterojunctions of SiH : SiC, energy bands of	723 B
Hollandites and rutile, dielectric relaxation in	709 B
Hopping conductivity, one dimensional	327 B
Hubbard model, ground state of	153 L
Hydrogen, effect of, in amorphous silicon	611 B
Hydrogen trapping in AlCu	113 B
Ice, dislocations in	289 A
Icosahedral and decagonal AlCuMn	343 L
Icosahedral phase in $Mg_{32}Al_{49}$	171 L
Icosahedral phase of MgGaAlZn	95 L
Indentation of alumina clay composite	77 L
InGaAs/GaAs, interfacial topography in	173 A
InP, a.c. properties of	233 B
Intercalated mixed conductors	1103 A
Interface structure of $Si/CoSi_2$	255 A
Interfacial boundaries in $Ti_3Al/TiAl$	361 A
Interfacial topography in InGaAs/GaAs	173 A
Interfacial transitions in Cu/Al_2O_3	561 A
Intermetallics, precipitation kinetics of	241 L
Ion transport and relaxation	1027 A
Ion transport in ceramics	1183 A
Ionic diffusion in oxide glasses	1061 A
Ionic diffusion in polymer matrices	1075 A
Ionic solids, conductivity in	983 A
Ionic transport in composites	1161 A
Ionic transport in polymer electrolytes	1093 A
Ionization breakdown, semiconductor impact	357 L
Kinetics of long and short range order	473 A
KMo_6O_{17}, charge-density waves in	221 L
La_2CuO_4, oxygen migration in	1131 A
Lattice conductivity vacancy migration model	393 L
Lattice perfection in diamond	543 A
Lattices, honeycomb, Hubbard model of	153 L
Lead magnesium niobate, dielectric relaxation	335 B
$L1_2$ alloys, mobility and stress in	365 L
$L1_2$ compounds, dislocations in	311 A
Light scattering by dislocations	425 B
Linear parabolic law of phase formation	619 A
Lithium mobility in solid electrolytes	1115 A

	PAGE
Magnetic and electrical properties of UCu_2Ge_2	741 B
Magnetism in high T_c superconductors	761 B
Magnetite, reduction of to Fe	105 L
Magnetite, Verwey transition in	623 B
Manning relations in regular solutions	341 A
Martensites, shape-memory	577 A
Martensitic transformation in CoNi	151 A
Matlockite structured phosphors	1121 A
Metal dichloride graphite intercalates	181 B
Metal oxides, conductivity in	999 A
Metallic glasses, calculation of properties	299 B
Metals, diffusion in vitreous chalcogenides	21 B
Metals, dislocations in	497 A
Metals, stressed, collisions in	201 A
$Mg_{32}Al_{49}$, icosahedral phase in	171 L
MgAl alloy, quasicrystal growth in	551 B
$MgAl_2O_4$, vacancies in	45 L
MgGaAlZn, icosahedral phase	95 L
MgO, Schottky pair formation in	1135 A
MgO microcubes, Au particles on	87 A
MnAl alloys, disordered, Fermi level in	591 B
Mo, proton-irradiated	395 A
Mo, relaxation at 10 MHz	613 A
Mo, stacking faults in	971 A
Na-cryolite solutions, electron localization in	167 B
Nb_2O_5, amorphous, conduction in	207 B
Nb_3Al, dislocations in	59 L
Ni based superalloy CMSX-2	135, 143 B
Ni superalloys, dislocations in	641 A
Ni_3Al, deformation of	807 A
Ni_3Al, dislocation mechanisms in	1291 A
NiB and NbTi, deformed, slip in	1345 A
NiMn, re-entrant, magnetic response of	153 B
Non-radiative efficiency in a-Si:H	235 B
Octagonal quasicrystal structure model	83 L
Omega phase in TiMo alloys	1201 A
Optical constants of amorphous doped SiC:H	101 B
Order, long and short range, kinetics of	473 A
Ordered structures in SiGe	183 L
Oxide glasses, ionic diffusion in	1061 A
Oxide growth on aluminium	345 B
Oxide superconductor, critical current density	143 L
Oxygen and nitrogen in silicon	513 A
Oxygen migration in La_2CuO_4	1131 A
Oxynitride films on Si	1 B
P doping in amorphous Si	245 B
Partials, super-Shockley, in deformed crystals	223 A
Particles, interaction with surfaces	213 A
$PbMgO_3$ relaxors	835 A
PbS, dissociated dislocations in	29 A
Phase formation, linear-parabolic law of	619 A
Phase mixtures in CoPt alloys	57 B
Phase transformations in AlCu	447 B
Phason disorder in quasicrystals	125 L

	PAGE
Phosphors, matlockite structured	1121 A
Photoelectrical properties of $AgInTe_2$	389 B
Plastic properties of crumpled wires	361 L
Point defects and diffusion in silver halides	1037, 1045 A
Polycrystals, deformation texture in	1253 A
Polymer electrolytes, ionic transport in	1093 A
Polymer matrices, ionic diffusion in	1075 A
Polymers, grain boundaries in	903 A
Positron lifetimes in He contained in metals	119 B
Precipitation kinetics of intermetallics	241 L
Proton-irradiated Mo, deformation of	395 A
Quasicrystal AlCuFe	49 L
Quasicrystal Al_6Li_3Cu, defects in	97 A
Quasicrystal AlPdMn	197 L
Quasicrystal dislocations	819 A
Quasicrystal growth in an MgAl alloy	551 B
Quasicrystal in $Al_{70}Ni_{15}Co_{15}$	629 B
Quasicrystal structure model	83 L
Quasicrystalline $Al_{65}Cu_{20}Co_{15}$, structure of	599 B
Quasicrystalline AlCuFe, phases in	129 L
Quasicrystallinity in AlCoCuSi	401 L
Quasicrystals, AlCuFe	475 B
Quasicrystals, elastic instability in	125 L
Quasicrystals in AlMnCu alloys	413 A
Quasicrystals in AlPdFe	165 L
Re-entrant NiMn, magnetic response of	153 B
Relaxation, stress, model for	89 L
Relaxation and ion transport studies	1027 A
Relaxation at 10 MHz in Mo	613 A
Relaxation in fragile glasses	421 L
Relaxation processes in SeGe	33 B
Retrograde solid solubility, mechanism for	15 L
Rock salt, dislocations in, interaction forces	39 A
Rutile and hollandites, dielectric relaxation in	709 B
Schottky barriers in amorphous SiGe alloys	367 B
Schottky pair formation in MgO	1135 A
SCRIBE process, damage in	133 L
SeGe, relaxation processes in	33 B
Semiconductor impact ionization breakdown	357 L
Semiconductor layers, electron diffraction of	1 A
Semiconductors, amorphous, a.c. conductivity of	579 B
Semiconductors, stacking fault energies in	413 B
Shape-memory alloy martensites	577 A
Shear planes in Al_5CuLi_3	483 A
Shear stress in transformation-toughening	879 A
Shockley partials in deformed crystals	223 A
Si, amorphous, charge limited currents in	379 L
Si, amorphous, P doping in	245 B
Si, growth mode transitions in	219 B
Si, growth of Al on	317 B
Si, oxygen and nitrogen implanted	513 A
Si, oxynitride films on	1 B
Si, twist boundaries in	587 A
SiC, disorder in	7 L

	PAGE
SiC:H, amorphous doped, optical constants of	101 B
SiC:SiH heterojunctions, energy bands of	723 B
Si:$CoSi_2$, interface structure of	255 A
SiF_4 plasma prepared silicon, properties of	533 B
SiGe, ordered structured in	611 B
SiGe alloys, amorphous, Schottky barriers in	367 B
Si:H, amorphous, disorder in	611 B
Si:H, amorphous, geminate recombination in	227 L
Si:H, amorphous, non-radiative efficiency in	235 L
Si:H, amorphous, photoconductivity in	675 B
Si:H, gap-state distribution in	515 B
Silicate glasses, MAS NMR of	401 B
Silicon, brittle–ductile transition in	55 A
Silicon, electronic properties of	533 B
Silver halides, point defects and diffusion in	1037, 1045 A
Si:SiGe superlattices, strain	597 A
Slip in deformed Nb and NbTi	1345 A
Solid solubility, retrograde, mechanism for	15 L
Solid state systems, diffusion in	749 B
Solids, defective, atomic transport in	1011 A
Solids, ionic, conductivity in	983 A
Solutions, regular, Manning relations in	341 A
Spin-bipolarons in high T_c superconductivity	211 L
Stacking fault energies in semiconductors	413 B
Stacking faults in AlCoNi	21 L
Stacking faults in FeAl	333 A
Stacking faults in Mo	971 A
Steel, stainless, grain boundaries in	1321 A
Strain, internal in $PbMgO_3$	835 A
Strain in Si/SiGe superlattices	597 A
Strength of fibres, effect of size on	1331 A
Stress, internal, in Cu	495 A
Stress, shear, in transformation-toughening	879 A
Stress in theory of disclinations	207 L
Stress relaxation, model for	89 L
Stressed metals, collisions in	201 A
Superalloy, cube glide in	669, 697 A
Superalloys, defects in	111 L
Superalloys, Ni, dislocations in	641 A
Superconductivity, high T_c spin-bipolarons in	211 L
Superconductor, oxide, current density in	143 L
Superconductors, CuO, Fermi liquid in	411 L
Superconductors, high T_c, magnetism in	761 B
Superionic conductors, simulation of	1147 A
Surfaces, crystalline, fractal analysis of	443 A
Surfaces, interaction with particles	213 A
Tellurium, thermoelectric power of	559 B
Tensile strength of fibre reinforced materials	1265 A
Thermoelectric power of Te under pressure	559 B
TiAl, dislocations in	117 L
Ti_3Al/TiAl, interfacial boundaries in	361 A
Tilt, coherent, of f.c.c. crystals	71 L
TiMo alloys, omega phase in	1201 A
Tip deformation in Cu	175 L
Titanium dioxide, conductivity in	999 A
Tracer diffusion and coordination number	83 B

	PAGE
Transport of matter in a random alloy	709 A
Twinning in CdS	303 A
Twinning in CrC	1 L
Twinning in YBaCuO	147 L
Twist boundaries in Si	587 A
UCu_2Te_2, magnetic and electrical properties of	741 B
Vacancies in copper, phonon spectra of	639 B
Vacancies in $MgAl_2O_4$	45 L
Vacancy migration model, lattice conductivity	393 L
Verwey transition in magnetite	623 B
Vitreous chalcogenides, diffusion of metals in	21 B
Vitrified solids, enthalpy cross-over in	37 L
Wires, crumpled, plastic properties of	361 L
YBaCuO, de-twinning of	147 L
YBaCuO, diffuse scattering in	29 L
Zn and Cd, vacancies in	735 A
ZnO, dislocations in	533 A
ZnSe and GaAs, lattice images of	81 A
ZrO_2, Y_2O_3 stabilized, deformation in	923 A
ZnO, dislocations in	533 A
ZnSe and GaAs, lattice images of	81 A
ZrO_2, Y_2O_3 stabilized, deformation in	923 A
